FOSTER WHEELER AG

FOSTER WHEELER SIGNS LICENSE AGREEMENT FOR ADVANCED PULVERIZED-COAL TECHNOLOGY IN INDIA

ZUG, SWITZERLAND, April 1, 2009 - Foster Wheeler AG (Nasdaq: FWLT) announced today that a subsidiary of its Global Power Group has entered into a 20-year agreement with BGR Boilers Private Limited, an affiliate of BGR Energy Systems Limited, to provide an advanced technology license for wall-fired subcritical and supercritical pulverized-coal (PC) steam generators to be sold in India.

The terms of the agreement were not disclosed. The contract value will be booked immediately upon the approval of the Indian Government, whose approval is necessary for BGR to enter in such a contract. Future royalty payments will be booked over the life of the agreement.

In addition, the two companies have agreed to cooperate on multiple prospective projects under separate contracts within the next five years, with Foster Wheeler providing the engineering and design along with selected major components.

“This agreement with BGR to jointly serve the domestic power market in India, represents a major step forward in our strategy to steadily expand our global presence,” said David J. Parham, executive vice president of Global Sales and Marketing, Foster Wheeler Global Power Group. “As India’s need for electric power continues to increase, the Foster Wheeler-BGR team will be positioned to add value by providing the Indian power generators with high-quality advanced technology to meet their growing power production needs.”

“BGR Energy is a leading EPC contractor in the power generation sector in India, and this partnership with Foster Wheeler to manufacture the full range of pulverized-coal boilers will increase the in-house contribution for our EPC projects and will enable us to offer a globally recognized quality product to the Indian customers,” said Mr. B. G. Raghupathy, chairman & managing director of BGR Energy Systems Limited.

Foster Wheeler AG is a global engineering and construction contractor and power equipment supplier delivering technically advanced, reliable facilities and equipment. The company employs over 14,000 talented professionals with specialized expertise dedicated to serving its clients through one of its two primary business groups. The company’s Global Engineering and Construction Group designs and constructs leading-edge processing facilities for the upstream oil and gas, LNG and gas-to-liquids, refining, chemicals and petrochemicals, power, environmental, pharmaceuticals, biotechnology and healthcare industries. The company’s Global Power Group is a world leader in combustion and steam generation technology that designs, manufactures and erects steam generating and auxiliary equipment for power stations and industrial facilities and also provides a wide range of aftermarket services. The company is based in Zug, Switzerland, and its operational headquarters are in Clinton, New Jersey, USA. For more information about Foster Wheeler, please visit our Web site at www.fwc.com.

BGR Energy, a company listed on the BSE and NSE Stock Exchanges in India, carries on business in two segments, as a manufacturer of capital goods and as a prime contractor for turnkey projects.

1. Capital Goods – design, engineer, manufacture and supply hi-tech systems and equipment for the power, oil & gas, refinery, petrochemical and process industries.

2. Turnkey Projects – engineering, procurement and construction (EPC) contracts for power, water and infrastructure projects in the oil & gas sector.

Safe Harbor Statement

Foster Wheeler news releases may contain forward-looking statements that are based on management’s assumptions, expectations and projections about the Company and the various industries within which the Company operates. These include statements regarding the Company’s expectations about revenues (including as expressed by its backlog), its liquidity, the outcome of litigation and legal proceedings and recoveries from customers for claims and the costs of current and future asbestos claims and the amount and timing of related insurance recoveries. Such forward-looking statements by their nature involve a degree of risk and uncertainty. The Company cautions that a variety of factors, including but not limited to the factors described in Part I, Item 1A “Risk Factors” of the Company’s most recent annual report on Form 10-K and the following, could cause the Company’s business conditions and results to differ materially from what is contained in forward-looking statements: risks related to the Company’s recent redomestication transaction, changes in the rate of economic growth in the United States and other major international economies, changes in investment by the oil and gas, oil refining, chemical/petrochemical and power industries, changes in the financial condition of its customers, changes in regulatory environments, changes in project design or schedules, contract cancellations, changes in estimates made by the Company of costs to complete projects, changes in trade, monetary and fiscal policies worldwide, compliance with laws and regulations relating to its global operations, currency fluctuations, war and/or terrorist attacks on facilities either owned by the Company or where equipment or services are or may be provided by the Company, interruptions to shipping lanes or other methods of transit, outcomes of pending and future litigation, including litigation regarding the Company’s liability for damages and insurance coverage for asbestos exposure, protection and validity of its patents and other intellectual property rights, increasing competition by foreign and domestic companies, compliance with its debt covenants, recoverability of claims against its customers and others by the Company and claims by third parties against the Company, and changes in estimates used in its critical accounting policies. Other factors and assumptions not identified above were also involved in the formation of these forward-looking statements and the failure of such other assumptions to be realized, as well as other factors, may also cause actual results to differ materially from those projected. Most of these factors are difficult to predict accurately and are generally beyond the Company’s control. You should consider the areas of risk described above in connection with any forward-looking statements that may be made by the Company. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any additional disclosures the Company makes in proxy statements, quarterly reports on Form 10-Q, annual reports on Form 10-K and current reports on Form 8-K filed with the Securities and Exchange Commission.
