### FOSTER WHEELER TO SUPPLY BIOMASS-FIRED BOILER ISLAND IN POLAND

ZUG, SWITZERLAND, September 8, 2009 - Foster Wheeler AG (Nasdaq: FWLT) announced today that a subsidiary of its Global Power Group has been awarded a contract by ZE PAK S.A. for the design, supply and erection of a 55 MWe biomass-fired circulating fluidized-bed (CFB) boiler island for the Konin Power Station in Poland.

Foster Wheeler has received a full notice to proceed on this contract. The terms of the agreement were not disclosed, and the contract value will be included in the company's bookings for the third quarter of 2009. Commercial operation of the new steam generator is scheduled for the first quarter of 2012.

Foster Wheeler will design and supply the steam generator and auxiliary equipment, and will carry out the erection and commissioning of the boiler island. The steam generator will be designed to burn wood biomass and up to 20% agro biomass.

"The fuel flexibility of Foster Wheeler's CFB technology provides an excellent solution for biomass power generation because it can accommodate a wide range of fuels. When combined with the CFB's demonstrated ability to reduce emissions, as compared to conventional boilers, this fuel flexibility enables the unit to operate with minimal environmental impact," said Jarosław Mlonka, president and chief executive officer of Foster Wheeler Energia Polska. "Our CFB product offering supports PAK's strategy of green energy production."

Foster Wheeler AG is a global engineering and construction contractor and power equipment supplier delivering technically advanced, reliable facilities and equipment. The company employs over 14,000 talented professionals with specialized expertise dedicated to serving its clients through one of its two primary business groups. The company's Global Engineering and Construction Group designs and constructs leading-edge processing facilities for the upstream oil and gas, LNG and gas-to-liquids, refining, chemicals and petrochemicals, power, environmental, pharmaceuticals, biotechnology and healthcare industries. The company's Global Power Group is a world leader in combustion and steam generation technology that designs, manufactures and erects steam generating and auxiliary equipment for power stations and industrial facilities and also provides a wide range of aftermarket services. The company is based in Zug, Switzerland, and its operational headquarters are in Clinton, New Jersey, USA. #### *Safe Harbor Statement*

Foster Wheeler AG news releases may contain forward-looking statements that are based on management's assumptions, expectations and projections about the Company and the various industries within which the Company operates. These include statements regarding the Company's expectations about revenues (including as expressed by its backlog), its liquidity, the outcome of litigation and legal proceedings and recoveries from customers for claims and the

costs of current and future asbestos claims and the amount and timing of related insurance recoveries. Such forward-looking statements by their nature involve a degree of risk and uncertainty. The Company cautions that a variety of factors, including but not limited to the factors described in the Company's most recent Annual Report on Form 10-K, which was filed with the U.S. Securities and Exchange Commission and the following, could cause the Company's business conditions and results to differ materially from what is contained in forward-looking statements: benefits, effects or results of the Company's redomestication, further deterioration in the economic conditions in the United States and other major international economies, changes in investment by the oil and gas, oil refining, chemical/petrochemical and power industries, changes in the financial condition of its customers, changes in regulatory environments, changes in project design or schedules, contract cancellations, changes in estimates made by the Company of costs to complete projects, changes in trade, monetary and fiscal policies worldwide, compliance with laws and regulations relating to its global operations, currency fluctuations, war and/or terrorist attacks on facilities either owned by the Company or where equipment or services are or may be provided by the Company, interruptions to shipping lanes or other methods of transit, outcomes of pending and future litigation, including litigation regarding the Company's liability for damages and insurance coverage for asbestos exposure, protection and validity of its patents and other intellectual property rights, increasing competition by non-U.S. and U.S. domestic companies, compliance with its debt covenants, recoverability of claims against its customers and others by the Company and claims by third parties against the Company, and changes in estimates used in its critical accounting policies. Other factors and assumptions not identified above were also involved in the formation of these forward-looking statements and the failure of such other assumptions to be realized, as well as other factors, may also cause actual results to differ materially from those projected. Most of these factors are difficult to predict accurately and are generally beyond the Company's control. You should consider the areas of risk described above in connection with any forward-looking statements that may be made by the Company. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any additional disclosures the Company makes in proxy statements, quarterly reports on Form 10-Q, annual reports on Form 10-K and current reports on Form 8-K filed with the Securities and Exchange Commission.
