

Industrial Boilers

Maintenance Parts

As the OEM we are able to guarantee and certify the correct dimensions, tolerances, and materials required for your replacement parts. Foster Wheeler has access to original drawings and documents that ensure a quality solution to the request. This obviously has great benefit and value in terms of installation ease, quality assurance, equipment efficiency, and personnel safety.

The Parts and Services Department supports the maintenance of our fleet of Industrial Boilers. This support typically consists of the supply and servicing of pressure part related items such as headers, drum internals, generation banks and superheater tubes. We also supply boiler accessories such as hand hole plugs, gaskets, slip spacers and door clamps which are readily available.

Should the need arise for a Field Service Engineer or an equipment assessment inspection, we can supply a Foster Wheeler expert anywhere in the world. We appreciate this opportunity to be of service to our equipment owners.

Industrial Boilers Part Supply

- Boiler Tubing
- Boiler Re-Tubing
- Header Replacements
- Finned Tubing
- Drum Internals
- Superheaters
- Access Doors
- Miscellaneous Parts
